

JOURDAIN

WORLD LEADER IN CATTLE TUBULAR

NEW PRODUCTS

JANUARY 2023

always **INNOVATING**

“With the feedback received from those using its equipment, JOURDAIN is constantly improving its range with new products while retaining the same design and manufacturing approach internally to guarantee you full control of processes, service and quality.””

NEW

GOAT HURDLE

The goat grid is easy to move and allows you to create enclosures to contain goats. Its vertical bars prevent the goats from climbing. It is made of Ø 27 mm and Ø 20 mm tubes and is 1.15 m high. The goat grids are attached to each other using a pin we supply.

CC3715	Vertical goat hurdle, H. 1 m L. 1.50 m, vertical with pin <i>Available in packs of 12</i>	21.4 kg
CC3720	Vertical goat hurdle, H. 1 m L. 2 m, vertical with pin <i>Available in packs of 12</i>	28.2 kg

NEW

BASIC SMALL ANIMAL HAY RACK

The bar design prevents the animals from trampling the hay. The hay bale is simply laid on the ground; there is no need either for troughs nor roof. It is made of 27 mm tubes, is 1.15 m high and features a 27 cm steel-sheet part. One part opens via a pin when it comes time to fill it up. The hay rack is available in 2 sizes, 1.60 x 1.60 m and 1.60 x 2.60 m, in individual packaging.

OPTION

VE2537 Partition pin for calf pen 1 kg

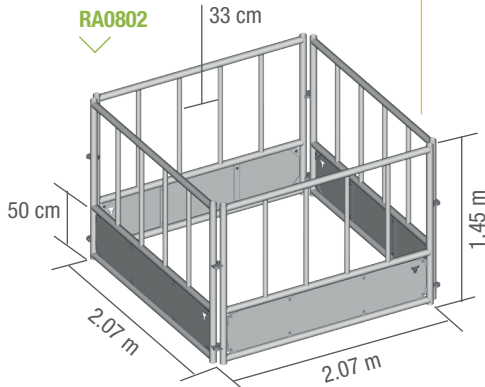

This cost-effective hay rack design consists of 4 barred units which are 1.45 m high with a 50 cm steel-sheet part. It features robust manufacturing with Ø 60 mm and Ø 42 mm tubes. The hay bale is simply laid on the ground; there is no need for troughs or roofing. Very easy to transport and easy to assemble, the hay rack is assembled with bolts or pins that are available as accessories. This model with a vertical head passage is intended for non-horned animals.

JOURDAIN'S
COMMITMENT

The "Made in France" logo is a statement that manufacturers or distributors may display, under certain conditions, on their products to certify that they are of French origin if they:

- derive a significant portion of their value from one or more manufacturing stages located in France;
- have undergone their last substantial transformation in France (source: www.economie.gouv.fr).

For JOURDAIN, this definition of "Made in France" is insufficient, which is why we have created our own logo which involves a much greater commitment:

- the French manufacture of our products guarantees full control over the design, manufacture, quality control and logistics in-house at our Escrennes site (Loiret, France).
